*Airmaster Series*  
Portable Air Conditioners

*the next  
Wave  
in Portable  
climate control*

Comfortable, **Cool,**  
**Beautiful,** spaces.  
Anywhere, anytime.

**No windows.  
No worries.**

Airmaster's next generation of portable air conditioners are as beautiful as they are powerful. Through innovation and craftsmanship, the KoldWave Airmaster Series helps you bring cool, productive, comfortable air conditioning and dehumidification to any windowless room. It's on-demand, effective climate control for areas where conventional air conditioners won't work. Controlled moisture levels reduce mold and provide greater comfort. From commercial spaces, to industrial and health care areas, the Airmaster Series is the easy and attractive way to instantly improve work space conditions.

All Airmaster models represent the ultimate in comprehensive design. They are built for convenience because they are entirely self-contained and easily portable. They are built for comfort because they incorporate electronic controls (including an available remote control), adjustable thermostat and multi-directional air flow. They are built for durability with heavy duty blowers and accumulators. And they are built for beauty with premium brushed stainless steel cabinetry.

So when you need permanent, supplemental or emergency spot cooling, discover the Airmaster Series air-cooled air conditioners. You'll find the new wave in reliable, flexible and convenient cooling performance.

*The Koldwave Airmaster Series helps turns static work spaces into cool, comfortable, dynamic areas.*

**Airmaster 4AK24**

Advanced ground fault shock protection

Easily cleaned metallic filters

Condensate reservoir on pressure plate for automatic notification

**Airmaster units are ideal for:**

- Interior offices
- Communications/switching rooms
- Athletic venues
- Basements
- Computer rooms
- Labs and examination rooms
- Special event enclosures
- Light manufacturing

The Airmaster Series is an attractive **solution** for **spaces** of all sizes.

*Because they provide climate control for specialized areas at specific times, Airmaster units are uniquely able to provide comfort with cost-effectiveness for a variety of industries.*

**4AK14**

### **Commercial**

Airmaster units are a smart complement to any central air conditioning system. In today's commercial spaces, office personnel often work after hours or on weekends when central air is either off or dramatically reduced. To be productive, however, they need to be comfortable. Airmaster units can supplement a central air conditioning system during off hours and provide backup if the central system goes down.

**Emergency. Temporary. Permanent cooling needs.**

### **Health care**

Clinical facilities have a unique interest in the comfort of their practitioners and patients. Medical areas frequently have localized cooling needs that cannot be met by their central air conditioning system. For example, some diagnostic equipment gives off more heat than many air systems were originally designed to handle: creating uncomfortable patient conditions and inefficient operational temperatures. Airmaster air conditioners return climate control to your rooms and provide cool, comfortable surroundings for patients undergoing MRIs, CAT scans, and other procedures. For emergencies, Airmaster's portability makes it easy to move cooling power to where it's needed.

**Koldwave works wherever you do.**

### **Industrial**

Cool, comfortable conditions are often a hot commodity in factories, warehouses, and laboratories. Workers in these spaces can benefit greatly from a productive boost of supplemental cooling. And Airmaster air conditioners go where other systems cannot. They perform beautifully for interior work areas with no windows and no outside air ventilation.

**4AK24**

# The Koldwave Airmaster Series.

## We've got **Performance** down **cold**.

### Features & Benefits

- Electronic controls with temperature display, diagnostics and compressor protection built-in
- An infrared remote control is available that allows adjustment of temperature setpoint, fan speed, on/off control

- Quiet and efficient
- Adjustable thermostat for temperature control
- Two-speed fan for user-controlled air-flow

- Multi-directional discharge grilles let you aim the air flow
- Optional condensate pump never needs priming and removes condensate automatically

- 115 volt (Koolette and Airmaster) or 230 volt power (4Ak24, 4AK30, 4AK65)
- Permanent filter slides out for easy cleaning

Multi-directional discharge grilles

Copper tube, aluminum fin evaporator coils

Condensate reservoir

Compressor with standard accumulator... mounted on rubber feet for quieter operation

Heavy duty lockable casters

Hard start kit standard

Dual evaporator fans for more even air distribution over the evaporator coil
